Experience

FREELANCER (Oct 2018 - current)

Offering my services and helping people build static web pages as well as single page applications.

Software Projects

Face Recognition

Developed a web app that allows users to detect faces in pictures using Clarafai's A.I API.

Utilised: ES6, React, Node.js, Express, PostreSQL.

Social Media Web app | DevConnector

Link: https://devconnector007.herokuapp.com/

Developed with a user centered development process, starting with concept and UI/UX design work, creating clean beautiful UIs.

Wrote the front-end code in (React, Redux, HTML5, CSS3) with focus on responsive web design and making it a progressive web app

Wrote back end code (Node.js) including authentication and input validation, adding like, comment, and posts functionality etc & creating MongoDB Database.

Deployed front and backend using Heroku.

The focus on these personal projects has been a software that shakes up industries .

Education

Bachelors of Science in IT (2019)

Learnt and built projects of C++, Java, C#, php etc.
